

17_11 Non-Plottable Cross Section Levels

Question:

I have cross section elements plotting out which I don't think are suppose to plot. Can I make a request to not plot these levels.

Answer:

Request granted. The following levels are placed on a "non-plottable" level in the Roadway Levels DGNLIB.

- Prop XS Exc Vertical Line 1
- Prop XS Exc Vertical Line 2
- Prop XS Exc Vertical Line 3
- Prop XS Exc Vertical Line 4
- Prop XS Exc Vertical Line 5
- Prop XS Shoulder Borrow Shape
- Prop XS Suitable Common Exc Shape
- Prop XS Suitable Subgrade Exc Shape
- Prop XS Suitable Subsoil Exc Shape
- Prop XS Wedging

In addition, level "Prop XS SS Elevation Text" will not plot due to hand modifications being done after Criteria has been processed and the Designer do not update the slope stake elevation. Even though these elements are displayed on screen, they will not be plot.
